

Critical Incident Debriefing

Critical Incident Debriefing (CID) is an essential component of 'best practice' and essential to maintaining a commitment to professional development, and the continuous improvement of services.

Debriefing critical incidents supports both individuals, and organisations to understand processes, unpack incidents, make-meaning of practice, and identify areas for future development.

Service Delivery

CID can be facilitated with individuals or groups, and delivered both face-to-face or online. It is essential that CID occurs in a timely manner following incidents and therefore, we are committed to remaining flexible in the service delivery of CID.

Cost

The average cost of CDI starts at \$80.00 for individuals and \$120.00 for groups. Contact us for an obligation, free quote.
